

Messungen der Bodenfeuchte

Die nachfolgenden Diagramme weisen den Bodenfeuchtegehalt an 13 verschiedenen Standorten (Abb. 1) im Berliner Stadtgebiet während des Zeitraums vom 01.01.2022 - 15.01.2024 auf.

Seit Mitte Januar 2023 sind Bodenfeuchte- und Bodentemperaturdaten über das [Wasserportal Berlin](#) tagesaktuell verfügbar. Die bisherigen 13 Messpunkte wurden um 10 (rote Messpunkte) auf nunmehr 23 Messpunkte, verteilt über das gesamte Berliner Stadtgebiet, erweitert. Über eine Downloadfunktion besteht nun zudem die Möglichkeit entsprechende Messdaten als Rohdaten im .csv Format abzufragen.

Wichtig: Die Darstellung der Bodenfeuchte, auch die Jahresübersicht, ist in dieser Form das letzte Mal erschienen.

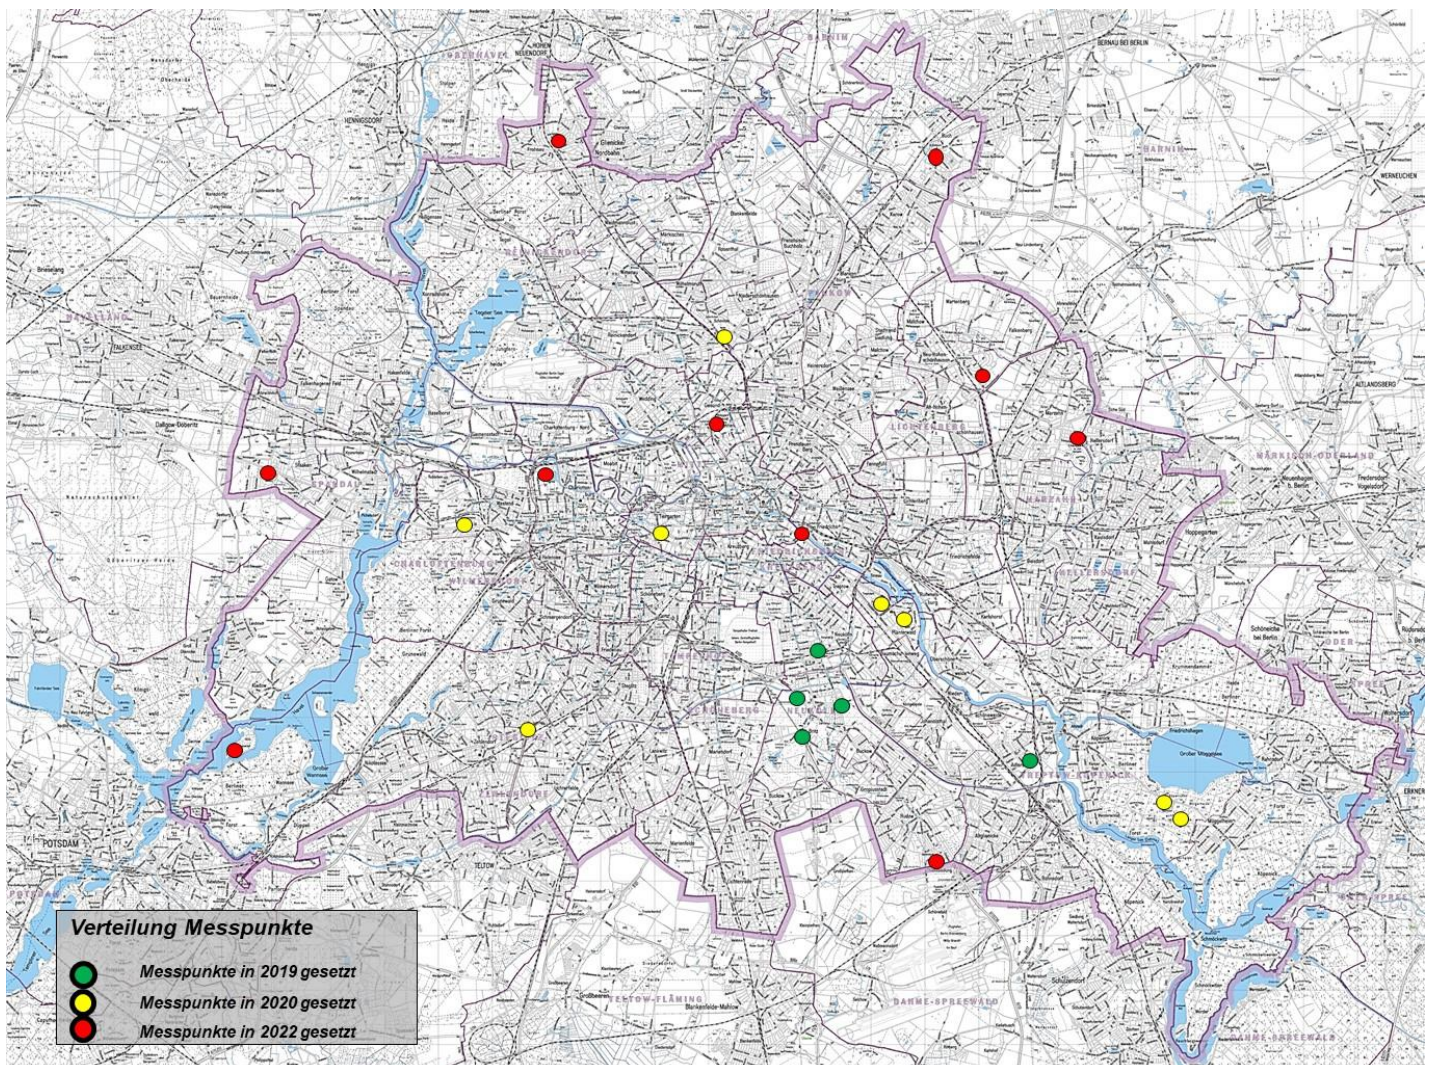

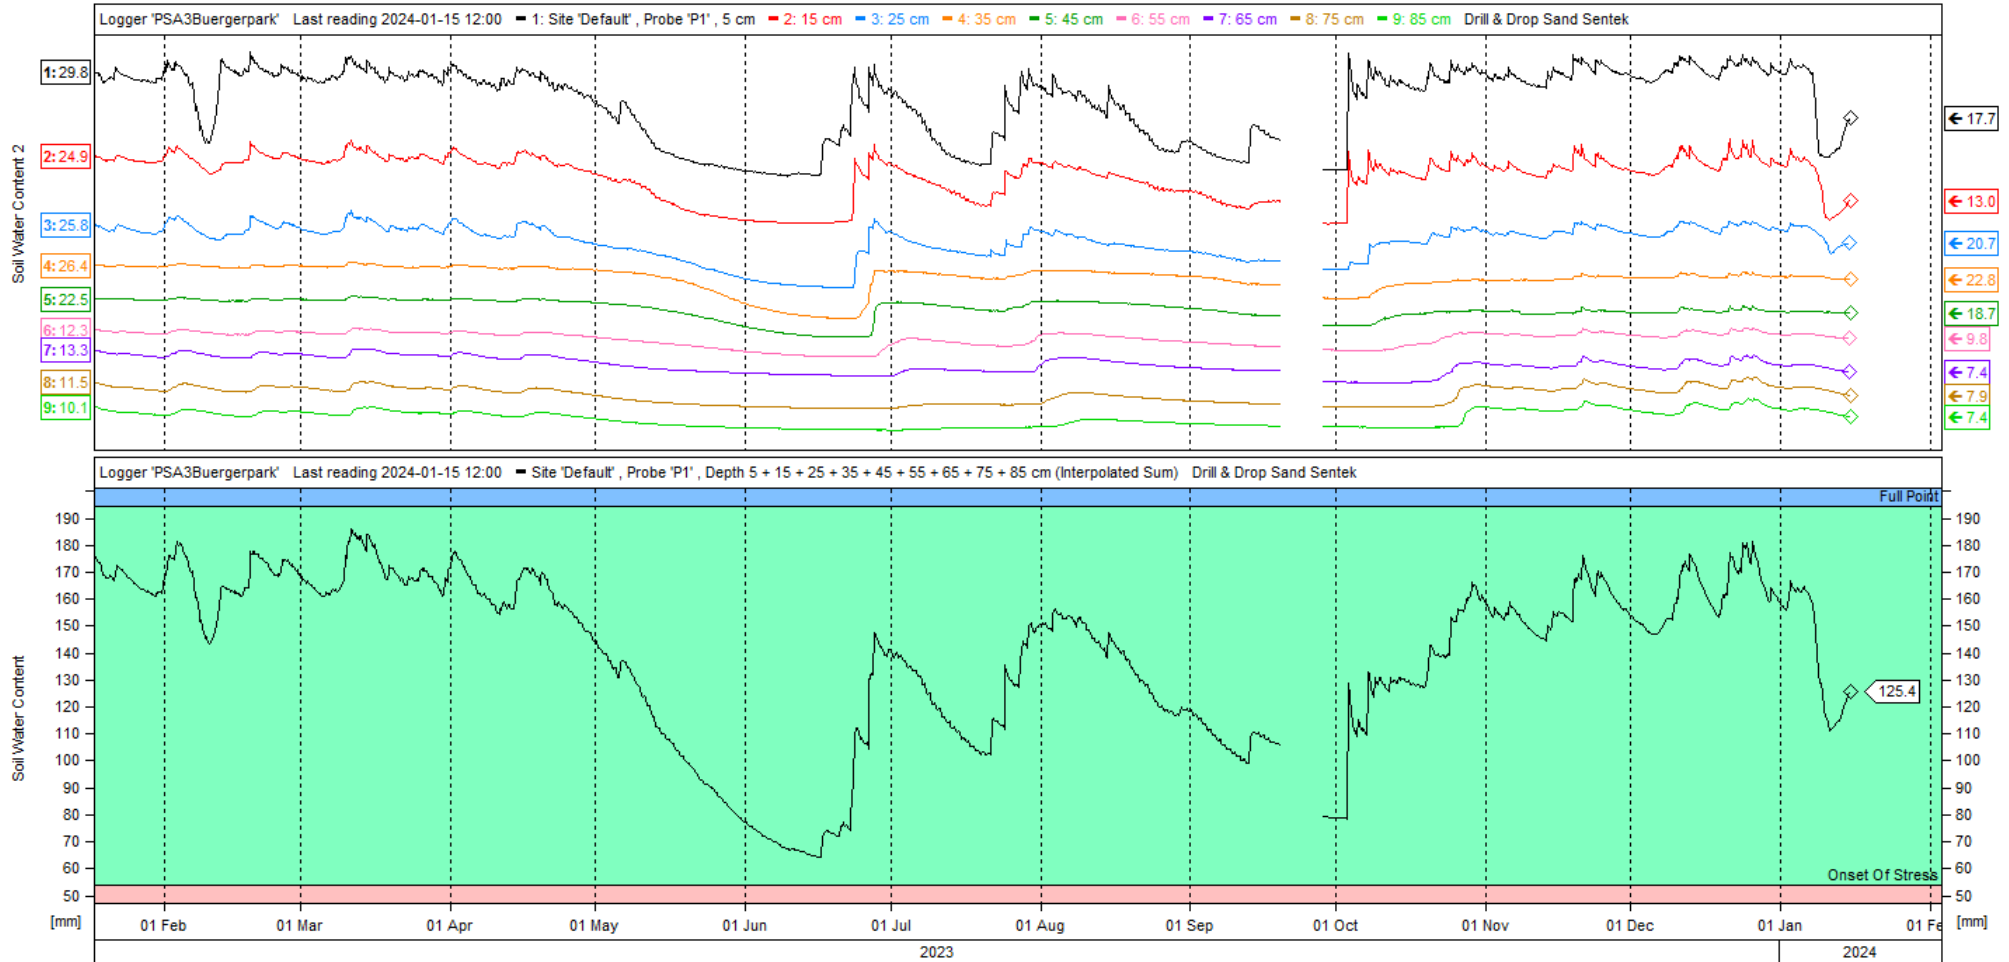

Abbildung 1: Messpunkte der Bodenfeuchte im Stadtgebiet bis in eine Tiefe von 85 cm
